السادة/ .....

السلام عليكم ورحمة الله وبركاته ،،، تحية طيبة وبعد

يمثل التدريب العملي أهمية قصوى لصقل معارف الطالب العلمية، ويساهم بشكل أو بآخر في إكسابه الخبرة العملية لممارسة واجباته تجاه خدمة المجتمع. كما أن التحاقه ببرنامج تدريبي عملي هو شرط أساسي ومطلب للتخرج وذلك خلال الفصل الدراسي الثاني حيث يبتدأ التدريب بتاريخ **2026/06/28** , **و لمدة شهرين أو أكثر مع التنويه بأن الفترة الإلزامية لتدريب الطالب والتي سيتم تقييمه عليها هي 8 أسابيع فقط والمدة المتبقية من فترة التدريب اختياريه للطالب.**

وانطلاقاً من مبدأ التعاون بين كلية علوم الحاسب وتقنية المعلومات بجامعة الإمام عبد الرحمن بن فيصل والإدارات الحكومية والقطاعات الخاصة لإتاحة الفرصة لتدريب وتأهيل الطلبة علمياً وعملياً وسعياً لتحقيق الأهداف المشتركة، عليه نأمل من إدارتكم قبول تدريب الطالب/ه الموضح/ة بياناته أدناه ومنحه فرصة التدريب لديكم في مجال تخصصه وتزويدنا بخطة التدريب.

اسم الطالب/ـة:	أنس بن عثمان بن إبراهيم الجبر	الرقم الجامعي:	2220004310

الرجاء توقيع وختم الخطاب مع ارفاق الخطة التدريبية للطالب/ة وارساله الى بريد وحدة التدريب التعاوني training.ccsit@iau.edu.sa

د. مي الدوسري

مع خالص التحية والتقدير ،،،

عميد كلية علوم الحاسب وتقنية المعلومات

د. خالد بن عدنان العيسى

Training Plan / الخطة التدريبية

Week/ الأسبوع	Tasks/ المهام
الأسبوع الأول Week1	
الأسبوع الثاني Week2	
الأسبوع الثالث Week3	
الأسبوع الرابع Week4	
الأسبوع الخامس Week5	
الأسبوع السادس Week6	
الأسبوع السابع Week7	
الأسبوع الثامن Week8	

Respected

Practical training is an important step for refining students' scientific knowledge and contributes to enhancing students' practical experience of practicing their duties towards community service. Graduation requirements include a practical training program during the 2nd term, starting from 28/06/2026, for 2 months or more, noting that the mandatory period for the training, for which he will be evaluated, is only 8 weeks, and the remaining period of the training is optional for the student.

As part of the cooperation between the College of Computer Science and Information Technology at Imam Abdulrahman Bin Faisal University and government and private sectors to provide the opportunity to train and qualify students scientifically and practically to achieve common objectives, we hope that you can accept the student, his/her details shown below, to get the best training opportunity in his/her field of specialization and provide us with the Training Plan and inform us if the application is accepted.

Student Name:	Anas Uthman Ibrahem Aljabr	**Student ID:**	2220004310

Please sign and stamp the letter and send it with the Training Plan to the Cooperative Training Unit email: training.ccsit@iau.edu.sa

Dr. Khalid Alissa
Dean of College of Computer Science and Information Technology

For more information about Bachelor of Science in Computer Science study plan at College of Computer Science and Information Technology, you may visit the college website:

Program link	QR Code
Bachelor of Science in Computer Science Study Plan	

Technical Skills for Computer Science Students:

- Programing skills
- Technical report writing
- Software development
- Project management
- Web development
- SQL & Database
- Operating Systems Linux
- Computer Network

Soft skills:

- Problem solving
- Critical thinking
- Creativity
- Teamwork
- Communications

For more information about Bachelor of Science in Computer Information Systems study plan at College of Computer Science and Information Technology, you may visit the college website:

Program link	QR Code
Bachelor of Science in Computer Information Systems Study Plan	

Technical Skills for Computer Information Systems Students:

- System Analysis and Design
- Report writing and presentation
- Project management
- Dealing with Databases
- Application of IT solutions for organization
- Programming skills
- Business process awareness

Soft skills:

- Problem solving
- Critical thinking
- Creativity
- Teamwork
- Communications

For more information about Bachelor of Science in Cyber Security and Digital Forensics study plan at College of Computer Science and Information Technology, you may visit the college website:

Program link	QR Code
Bachelor of Science in Cyber Security and Digital Forensics Study Plan	

Technical Skills for Cyber Security Students:

- Design and development of security systems
- Testing and analysis of security systems
- Installation and Configuration of security tools
- Forensics investigation of security systems
- Detection and prevention of threats / vulnerabilities in security systems
- Active and passive penetration testing for analyzing secure systems
- Identify, plan and implement strategies to mitigate security risks

Soft skills:

- Problem solving
- Critical thinking
- Creativity
- Teamwork
- Communications

For more information about Bachelor of Science in Artificial Intelligence study plan at College of Computer Science and Information Technology, you may visit the college website:

Program link	QR Code
Bachelor of Science in Artificial Intelligence Study Plan	

Technical Skills for Artificial Intelligence Students:

- Conceptualization of a machine learning project or idea
- Solve data processing problems
- Data visualization
- Carry out data cleaning and other preprocessing tasks including outlier detection and treatment, missing values treatment, etc.
- Build machine learning models following established standard practice towards letting the data speak
- Improving models accuracy by optimizing hyperparameter values of the ML algorithms
- Discuss Machine modeling outcomes and use appropriate visualization tools to aid results discussions
- Developing Intelligent Software Applications
- Exploratory data analysis
- Building dashboards for Intelligent Systems
- Developing Machine Learning models for various AI applications areas like business, oil and gas, security, etc.

Soft skills:

- Problem solving
- Critical thinking
- Creativity
- Teamwork
- Communications
